FEW WORDS ABOUT ME

I am a graphic, web and 3D designer with 9 years of experience in the field. I have a wide range of design-related skills, such as corporate identity, packaging, mobile UI, website and 3D design. I can also, design 3D animation and I pay close attention to the things that will serve best the website and/or mobile user experience.

I design mockups for every project, giving creative effort in project presentation. I work well with others and I have been in large creative teams with other designers, developers, video editors, copywriters and marketing executives.

I am creative, passionate, I adapt to client feedback, and even though I pay attention to detail, I'm fast and efficient.
